SECTION 1 – GENERAL

Please provide a brief overview of your corporate history?

Mister Kleen Maintenance Company, Inc. is a family-owned, professionally managed janitorial and maintenance provider founded in 1976 and headquartered in Alexandria, Virginia. We specialize in delivering high-quality cleaning services to Class A commercial and high-security facilities throughout the DC Metro region. With over 45 years of experience, we combine proven processes, advanced technology, and a strong commitment to safety, sustainability, and customer satisfaction.

Company size including number of employees?

Mister Kleen employs over 400 team members, including dedicated operations, quality control, HR, and recruiting staff supporting our field operations.

Please list your (5) five largest national accounts by revenue and briefly explain what you do for them, please also include industry and general requirement.

Mister Kleen services a diverse portfolio of Class A commercial and high-security facilities, including partnerships with organizations such as Boston Properties, Cushman & Wakefield, CBRE, JLL, and The Peterson Companies.

Please provide the total number of companies that utilize your services

We currently service over 80 facilities totaling more than 10 million square feet across the DC Metro region.

Provide a list of the companies that utilize your services in a similar manner to HITT?

Our client base includes commercial real estate firms, government facilities, high-security environments, and owner-occupied corporate headquarters.

What competitive advantages does your company possess that would allow you to successfully support our company in our goal of partnering with a provider?

- Over 45 years of industry experience
- Family-owned with hands-on leadership
- Green Seal (GS-42) certified program
- Active Top Secret facility clearance
- Robust Quality Assurance (QA) program
- Dedicated HR and recruiting team
- Proven success in Class A and high-security environments

Describe your company's supplier diversity programs and community partnerships

Mister Kleen supports supplier diversity by partnering with a broad network of vendors and maintaining inclusive hiring and procurement practices aligned with our clients' diversity goals

Please highlight efforts your company has made to increase business with women, minorities, service-disabled veterans, or small disadvantage-owned businesses (regionally, locally, or nationally)

As Mister Kleen self performs it provides, we are unable to provide our business diverse partners. For our equipment supplies and materials we are a part of a national buying group to give us the best possible pricing to be competitive for our client partners, therefore who we purchase from is dictated by the buying group membership, in addition, from a supplier - distributor aspect, companies continue to consolidate, MisterKleen currently uses two local distributors, both of which were originally family owned, however now through acquisitions they are now a part of a national chain.

Please provide a sample of your quarterly subcontracting report that highlights diverse spend amounts.

Mister Kleen self-performs all core janitorial services. Subcontracting is not part of our standard delivery model, ensuring quality control and consistency.

What are some ways you have been able to provide cost savings or efficiencies for your janitorial clients?

- Efficient team cleaning approach
- Use of battery-powered and high-efficiency equipment
- Chemical dilution systems for cost control
- Preventative maintenance programs
- Optimized staffing based on production rates

Have you provided janitorial services in Net Zero or LEED-certified buildings? If so, please list examples and references.

Yes. Mister Kleen has extensive experience supporting LEED-certified buildings and sustainability initiatives, including Green Seal (GS-42) programs and LEED certification support.

SECTION 2 - CUSTOMER SERVICE

Please describe your customer service philosophy as it relates to janitorial services.

Our philosophy is centered on partnership, responsiveness, and accountability. We provide a single point of contact, maintain consistent communication, and proactively address client needs to ensure complete satisfaction.

Please describe your experience and approach to Client Satisfaction Surveys and how feedback is used to improve janitorial performance.

We utilize a structured escalation process, communication logbooks, and technology platforms (eHub) to track, respond, and resolve issues promptly typically within 24 hours or sooner depending on urgency.

SECTION 3 - KPI

How does your company define and measure a successful janitorial partnership over a two (2) year engagement?

Success is measured through consistent service delivery, client satisfaction, inspection scores, responsiveness, and adherence to KPIs.

Please describe your standard practice for Quarterly Business Reviews (QBRs), including janitorial KPIs such as quality audits, response times, staffing levels, and issue resolution.

Our QBRs provide a structured, data-driven review of janitorial performance using our Five-Tier Quality Assurance program and technology-enabled quality control processes. Each quarter, our leadership team meets with the client to review: Quarterly Audits, Response Times, Staffing Levels & Issue Resolution.

SECTION 4 - SUSTAINABILITY

What sustainability practices do you use for janitorial services at accounts of similar size (e.g., green chemicals, microfiber systems, water conservation)?

- Green Seal (GS-42) certified cleaning program
- Use of environmentally preferable products
- Microfiber systems reducing waste
- HEPA filtration vacuums
- Waste and recycling programs "

With our new HQ being Net Zero, what janitorial measures, products, and processes would you implement to support this goal?

We support Net Zero environments through reduced chemical usage, energy-efficient equipment, sustainable processes, and alignment with LEED and environmental standards.

SECTION 5 - OPERATIONS

Do you subcontract any of your services, if so, how are they vetted and approved?

Mister Kleen does not subcontract janitorial services. All work is self-performed to maintain quality and accountability.

We are asking for a 24-hour guaranteed response time, what is your response time offer to HIT?

We provide rapid response capabilities, including emergency services with immediate acknowledgment and prompt on-site support that includes a guaranteed 24 hour response time.

What pre-screening service do you utilize for background checks, reference checks, etc.?

All employees undergo thorough screening, including background checks and E-Verify to confirm work eligibility.

Describe your approach to staff retention in order to minimize personnel turnover and indicate benchmarks used to measure these statistics,

"Low turnover is achieved through:

- Competitive wages and benefits
- Training and career development
- Positive work environment
- Employee recognition programs "

Describe your employee sanitation program.

Employees are trained in sanitation protocols, PPE usage, and proper cleaning techniques aligned with GS-42 and OSHA standards.

SECTION 6 - WELLNESS

Describe how your janitorial program supports occupant health and wellness (e.g., infection prevention, high-touch surface protocols, indoor air quality support).

We create clean, healthy environments through disinfection protocols, green cleaning practices, and attention to high-touch surfaces.

Describe how you communicate janitorial schedules, cleaning methods, and wellness initiatives to HITT and building occupants.

Schedules and updates are communicated through supervisors, logbooks, and digital platforms such as eHub.

How does your company adapt janitorial services to accommodate special occupant needs or health-related requests?

We adjust staffing and cleaning frequencies based on occupancy levels, events, and building usage patterns.

SECTION 7 - TECHNOLOGY

What janitorial management systems or software platforms do you use for work orders, inspections, and service tracking?

Mister Kleen utilizes eHub and WinTeam for scheduling, reporting, inspections, and communication.

Describe how you use technology for quality assurance (digital inspections, audits, reporting, dashboards).

Inspections are conducted digitally with real-time reporting and tracking of performance metrics.

Do you provide real-time communication tools or portals for submitting janitorial requests and tracking resolution?

Yes, clients have access to real-time communication and reporting through eHub.

Describe how technology is used to improve efficiency, reduce labor costs, and optimize cleaning schedules.

Technology streamlines scheduling, reporting, quality control, and responsiveness, improving overall efficiency and transparency.

SECTION 8 - FINANCIALS

Please state your company revenue for the past three years.

Mister Kleen is a financially stable, privately held company with consistent year-over-year growth (specific financials available upon request).

Provide pricing structure options and recommendations (fixed fee, unit-based pricing, hybrid models, etc.).

We provide transparent pricing based on labor, supervision, equipment, and scope requirements, with options tailored to meet HITT's operational needs and contract structure.

1. PROPOSED SOLUTIONS FOR SERVICES

Mister Kleen is fully equipped to deliver high-quality, sustainable janitorial services that support a LEED Platinum and Net-Zero headquarters environment. Our approach combines certified green cleaning products, energy-efficient equipment, and thoroughly trained staff to maintain all areas of the facility at the highest standard of cleanliness and presentation.

1.1. General Cleaning & Sanitizing of Offices, Conference Rooms, and Common Area

Our cleaning program delivers high-quality, consistent service five (5) days per week, supporting HITT's workplace experience and sustainability goals. Day porters maintain daytime cleanliness with touchpoint disinfection, conference room resets, and spill response, while nightly crews perform full cleaning, sanitizing, vacuuming with battery-powered equipment, and waste removal.

1.2. Vacuuming of Carpeted & Soft-Surface Areas

Battery-operated HEPA vacuums ensure quiet, efficient, and IAQ-friendly cleaning. Daily vacuuming of all carpeted and soft-surface areas using battery-powered equipment. Spot cleaning occurs during the day, while detailed nightly vacuuming supports cleanliness and air quality. Bi-annual deep carpet and upholstery cleaning is included.

1.3. Restroom & Kitchen/Pantry Cleaning and Disinfection

Restrooms and pantries receive multiple daily touch-point disinfection, restocking and trash removal as needed, and full nightly service. including restocking, sanitizing, and odor control. All disinfectants meet LEED requirements and minimize VOC exposure.

Dedicated Day Porters will continuously inspect, spot clean and restock where necessary all restrooms, with a high focus on high usage locations, and presence for the duration of large meeting / conference times. Evening cleaners will provide full cleaning and disinfection of all restrooms each evening. Trash will be removed, supplies restocked, floors swept/ vacuumed and mopped with green seal certified germicidal cleanser.

1.4. Interior Glass, Stainless Steel, & Stone Surface Cleaning

Glass cleaned: with ionized or green-certified solutions for streak-free results.

Stainless Steel: Mister Kleen does not use oil-based products on stainless

Stone and Terrazzo: cleaned with pH-neutral products to prevent surface damage.

Hard Surface Flooring: Mister Kleen's hard-surface floor care program—built on the 3M™ Scotchgard™ Resilient and Stone Floor Protection System—offers a sustainable solution well-suited for facilities targeting or maintaining LEED Platinum certification. The system is environmentally preferable, featuring a zinc-free, low-odor, low-VOC formulation that reduces exposure to harsh chemicals and supports cleaner indoor air quality, an important element in LEED's Indoor Environmental Quality category. By eliminating or significantly reducing the need for stripping and refinishing, the program decreases wastewater discharge, lowers chemical consumption, and reduces labor hours—helping facilities meet sustainability goals through minimized water use and reduced environmental impact. Additionally, the system's high durability and long-lasting protection mean fewer coats and less overall product usage, further contributing to operational efficiency and resource conservation in alignment with LEED Platinum performance requirements.

Day Porters will monitor and provide spot cleaning on interior glass throughout the lobby, amenities and conference spaces. Evening Cleaners will spot clean and polish interior glass and stainless steel to maintain a class A building standards and presentation.

1.5. Gym & Locker Room Cleaning and Equipment Disinfection

Our approach ensures the gym and locker room environments remain sanitary, odor-free, and safe for daily use, aligning with HITT's wellness-focused workplace standards.

Day Porters will continuously monitor this area for spills, maintenance issues and spot clean throughout the day. Evening cleaners will provide full cleaning and disinfection as described above of all surfaces to include disinfection of all gym equipment. Supplies will be restocked.

1.6. Waste & Recycling Removal (Interior & Exterior)

Daily waste and recycling collection supporting the building's waste-diversion goals. Proper segregation and handling ensure alignment with sustainability standards.

Day Porters will continuously monitor and empty, when necessary, receptacles in all common spaces, to include amenity areas, conference rooms, pantries & kitchens, restrooms and on the exterior grounds. Night cleaners will remove trash from all office spaces and throughout the facility, replacing liners where needed.

1.7. Loading Dock & Rooftop Deck

Daily cleaning and policing of debris, ensuring these high-traffic support areas remain organized, safe, and presentable.

Day Porters will patrol the loading docks and rooftop deck daily, ensuring high touch surfaces are sanitized, area is presentable and maintained, with evening janitorial cleaners providing surface cleaning and disinfections

1.8. Cleaning Frequencies (Summary Response)

Mister Kleen will adhere to all required frequencies, including:

- Daily: Offices, conference rooms, pantries, restrooms, gym, locker rooms, lobby, terrazzo flooring, loading dock, exterior areas
- Quarterly: Interior glass, Mister Kleen recommends ongoing restroom scrubbing at an additional cost
- Bi-Annually: Carpet and upholstery deep cleaning

1.9. Staffing, Supervision & Quality Control

Day Porter Services (6:30 AM – 5:00 PM)

Day Porters will have a staggered schedule with arrivals at 6:30am (1), 7:00am (1), and 8:30am (2) each with an 8-hour shift.

Night Cleaning Services (5:00 PM – 9:00 PM)

Janitorial Tasks Include:

Evening janitorial will begin at 5:00 pm with a total of (8) cleaners,

1.10. Supervision

A dedicated Day Supervisor and dedicated Night Supervisor will oversee operations, perform inspections, and ensure task completeness. The Day Supervisor will maintain primary communication with Facility Management. This ensures rapid response, consistency, and clear escalation paths.

1.11. Quality Control

Our quality and service delivery program is built on the Harvard Smart technology platform, which provides real – time monitoring of workflow, quality assessments, communication and work – order management to ensure consistent, high quality environmental stewardship to create a clear framework for measuring results. Service issues can be reported instantly through smartphones, computers or tablets, generating immediate notifications and tracking so that management can respond proactively.

1.12. Supplies & Sustainability Requirements

Mister Kleen delivers a sustainability-driven solution that meets all supply and environmental requirements through the use of Green Seal GS-42 certified products, CIMS-GB with Honors operational practices, and a rigorous EHS&S-led procurement process. Our approach ensures safer chemicals, sustainable equipment, improved indoor air quality, and ongoing alignment with LEED, WELL, and Fitwel standards—providing clients with verifiable, health-focused, and environmentally responsible service delivery.

Mister Kleen will provide all green-certified chemicals, tools, and equipment required to support LEED standards. All methods prioritize indoor air quality, chemical reduction, low-emission equipment, and environmental stewardship. HITT-provided consumables will be integrated into our restocking program.

1.13. Equipment Requirements – Power Availability Constraint

Mister Kleen acknowledges the requirement to use battery-operated cleaning equipment for daily maintenance due to limited electrical outlets. Our plan incorporates charging stations, spare batteries, and equipment redundancy to ensure fully reliable service without interruption.

2. QUALITY CONTROL PLAN

2.1. Project: HITT Headquarters – Falls Church, VA

2.1.1. Objective

Mister Kleen's Quality Control (QC) Program is designed to ensure consistent, high-quality janitorial services that align with HITT's operational goals, workplace experience expectations, and LEED Platinum / Net-Zero standards.

Our QC program focuses on:

- Daily service validation
- Immediate issue resolution
- Proactive identification of risks in high-visibility areas

2.1.2. QC Organizational Structure

- **Day Supervisor (On-Site Lead)**
 - Primary point of contact
 - Oversees day porter services and occupant-facing quality
- **Night Supervisor**
 - Manages nightly cleaning execution
 - Conducts end-of-shift inspections
- **QC Manager (Off-Site / Regional)**
 - Independent oversight
 - Performs scheduled audits and trend reviews

2.1.3. Inspection Program

To align with the building's high-traffic and amenity-driven design, inspections will be structured as follows:

Daily

- Day Supervisor:
 - Restrooms (multiple checks)
 - Pantries / café / coffee areas
 - Lobby / reception
- Night Supervisor:
 - Full building walkthrough post-cleaning

Weekly

- Formal scored inspections:
 - Offices

- Conference spaces
- Wellness and gym areas
- High-touch surfaces

Monthly

- Comprehensive audit:
 - All floors and service zones
 - Equipment condition
 - Sustainability compliance

2.1.4. Area-Based Quality Prioritization

Based on building usage:

Tier 1 – Critical (Multiple Daily Touchpoints)

- Lobby & reception
- Café / coffee / wine bar
- Restrooms
- Conference center

Tier 2 – High Engagement

- Wellness suite / gym
- Pantries / collaboration areas
- Roof deck access points

Tier 3 – Standard

- Office floors (Levels 3–6)

2.1.5. Scoring & Standards

- Inspection scale: 0–100%
- Acceptable threshold: $\geq 90\%$
- Immediate corrective action: $< 90\%$

Critical areas must maintain:

- Near-continuous readiness during business hours

2.1.6. Deficiency & Corrective Action Process

1. Issue identified (inspection or occupant feedback)

2. Logged in QC system
3. Immediate response (for critical areas)
4. Root cause identified:
 - Staffing
 - Training
 - Frequency
5. Corrective action implemented within defined timeframe

2.1.7. Technology & Reporting

- Digital inspection platform (mobile-enabled)
- Real-time tracking of:
 - Inspections
 - Work orders
 - Issue resolution
- **Reporting cadence:**
 - Weekly summary to HITT
 - Monthly performance dashboard

2.1.8. Integration with Day Porter Program

Day porters (6:30 AM – 5:00 PM coverage) are embedded into QC:

- Continuous monitoring of:
 - Restrooms
 - Pantries
 - High-traffic zones
- Immediate response to:
 - Spills
 - Restocking needs
 - Occupant requests

2.1.9. Sustainability Compliance Monitoring

- Use of LEED-compliant products and processes
- Monitoring:

- Chemical usage
- Waste handling
- Equipment efficiency (battery-operated requirements)

3. QUALITY ASSURANCE PLAN

3.1. Project: HITT Headquarters – Falls Church, VA

3.1.1. Objective

The Quality Assurance (QA) Program ensures that the QC system is effective, consistent, and continuously improving over time.

3.1.2. QA Oversight Structure

- QA Manager (independent from site operations)
- Reports at regional level

3.1.3. QA Activities

A. QC Validation Audits

- Verify:
 - Inspections are performed
 - Scores are accurate
 - Issues are properly resolved

B. Random Independent Inspections

- QA re-inspects previously scored areas
- Detects:
 - Score inflation
 - Missed deficiencies

C. Trend & Risk Analysis

Monthly review of:

- Recurring issues
- High-risk areas:
 - Lobby
 - Café
 - Wellness spaces
- Staffing adequacy

D. KPI Tracking

- Inspection scores over time
- Response times

- Complaint frequency
- Repeat deficiencies

E. Customer Feedback Integration

- All feedback logged and categorized:
 - Service quality
 - Responsiveness
 - Experience
- Tied back to:
 - QC scores
 - Staffing levels

3.1.4. Continuous Improvement Process

Monthly QA Review with HITT:

- Review trends
- Identify improvements
- Adjust:
 - Staffing levels
 - Cleaning frequencies
 - Methods

3.1.5. Risk Mitigation Strategy

Focused on:

- High-visibility areas (lobby, conference center)
- Event-driven usage spikes
- Amenity-heavy spaces

3.1.6. Reporting

Monthly QA Report includes:

- Performance trends
- Key risks
- Corrective actions
- Improvement initiatives

4. PROPOSED SOLUTIONS FOR JANITORIAL SERVICES

4.1. HITT Headquarters – Falls Church, VA

4.1.1. Service Delivery Approach

Mister Kleen’s service approach is built around supporting HITT’s workplace experience, sustainability goals, and high-visibility environment. This is not a traditional office cleaning program—this is an actively managed, experience-driven facility.

The building’s design—including high-traffic public areas, amenity-rich spaces, and continuous daytime occupancy—requires a **hybrid service model** that prioritizes both daytime responsiveness and consistent nightly execution.

Our approach is structured around three core principles:

- **Continuous Readiness** – High-visibility areas remain clean, stocked, and presentation-ready at all times
- **Amenity-Focused Cleaning** – Specialty spaces receive elevated care aligned with their use
- **Proactive Service Delivery** – Issues are identified and resolved before impacting occupants

4.1.2. Staffing & Coverage Model

Daytime Operations (6:30 AM – 5:00 PM)

Proposed Structure:

- Day Supervisor (1)
- Day Porters (multi-zoned coverage)

Zone-Based Deployment:

- **Zone 1:** Lobby, reception, conference center
- **Zone 2:** Café, pantry, coffee/wine bar
- **Zone 3:** Wellness, gym, locker rooms
- **Zone 4:** Office floors + circulation areas

Key Responsibilities:

- Continuous restroom and pantry maintenance
- Spill response and touchpoint cleaning
- Occupant interaction and support
- Event setup/reset coordination

Day staff are trained as **front-facing service personnel**, not back-of-house cleaners.

Evening Operations (5:00 PM – 9:00 PM)

Structure:

- Night Supervisor (1)
- Cleaning technicians (zone-based)

Focus:

- Full facility reset
- Detailed cleaning
- Preparation for next-day occupancy

4.1.3. High-Traffic & Public Space Strategy

The first floor and collaboration spaces require enhanced service due to:

- Visitor traffic
- Events
- Brand visibility

Enhanced Approach:

- Increased daytime inspection frequency
- Dedicated porter presence
- Rapid-response cleaning (<10-minute response target)

Spaces prioritized:

- Lobby & reception
- Conference center
- Café & hospitality areas

4.1.4. Amenity & Specialty Space Cleaning

This facility includes non-traditional office environments requiring elevated care:

Café / Coffee / Wine Bar

- Hospitality-level cleanliness
- Frequent touchpoint disinfection
- Visual presentation standards

Wellness Suite / Gym / Locker Rooms

- Enhanced sanitation protocols
- Odor control management
- Multiple daily cleanings

Roof Deck & Exterior Areas

- Daily debris removal
- Weather-responsive cleaning
- Event readiness

4.1.5. Office & Standard Area Cleaning

Typical office floors (Levels 3–6) will follow a structured and efficient cleaning program aligned with occupancy patterns.

- Daily cleaning (night)
- Daytime touchpoint support
- Conference room resets

4.1.6. Sustainability & LEED Alignment

The building's LEED Platinum and Net-Zero goals are central to our approach.

Our Commitments:

- Green Seal / EcoLogo-certified chemicals
- Microfiber systems to reduce waste
- Water-efficient cleaning practices
- Waste stream support (recycling compliance)

4.1.7. Equipment & Power Constraint Solution

We recognize the building's **limited electrical outlet availability** and have designed our approach accordingly.

Battery Equipment Strategy:

- Commercial-grade battery vacuums and auto-scrubbers
- Rotational charging stations
- Backup battery inventory (minimum 20–30% redundancy)

Operational Plan:

- Charging scheduled during low-use periods

- Equipment staged by zone
- Zero disruption to daytime operations

4.1.8. Quality Control & Continuous Improvement

Mister Kleen implements a layered Quality Control (QC) and Quality Assurance (QA) framework designed to maintain consistent service performance, support HITT's workplace experience standards, and drive continuous improvement across all building zones.

The Quality Control (QC) – Daily Performance Assurance

QC Activities include daily walkthroughs, weekly scored inspections, and monthly comprehensive audits, all supported by our mobile inspection platform for transparent tracking and reporting.

The Quality Assurance (QA) – Independent Verification & Continuous Improvement

The QA program provides independent oversight by the Area Manager Emma Ventura to confirm the accuracy of QC processes. QA activities include validation of audits, random spot inspections, KPI and trend analysis, and integration of occupant feedback. Monthly QA reviews with HITT guide adjustments to staffing, frequencies, and service methods to ensure the program evolves with building needs.

4.1.9. Communication & Reporting

HITT will receive a single, clearly defined point of contact. Our experienced Day Supervisor will serve as the primary liaison for your facility manager, ensuring structured communication and rapid response—typically within minutes—whenever support is needed.

Our Approach:

- Dedicated Area for both HITT facilities, Emma Ventura
- On-site Supervisor (daily contact)
- Monthly Business Reviews

Optional Enhancements:

- Digital dashboard access:
 - Inspection scores
 - Work orders
 - Issue tracking

5. QUALITY CONTROL PLAN

5.1. Project: HITT Headquarters – Falls Church, VA

5.1.1. Objective

Mister Kleen's Quality Control (QC) Program is designed to ensure consistent, high-quality janitorial services that align with HITT's operational goals, workplace experience expectations, and LEED Platinum / Net-Zero standards.

Our QC program focuses on:

- Daily service validation
- Immediate issue resolution
- Proactive identification of risks in high-visibility areas

5.1.2. QC Organizational Structure

- Day Supervisor (On-Site Lead)
 - Primary point of contact
 - Oversees day porter services and occupant-facing quality
- Night Supervisor
 - Manages nightly cleaning execution
 - Conducts end-of-shift inspections
- QC Manager (Off-Site / Regional)
 - Independent oversight
 - Performs scheduled audits and trend reviews

5.1.3. Inspection Program

To align with the building's high-traffic and amenity-driven design, inspections will be structured as follows:

Daily

- Day Supervisor:
 - Restrooms (multiple checks)
 - Pantries / café / coffee areas
 - Lobby / reception
- Night Supervisor:
 - Full building walkthrough post-cleaning

Weekly

- Formal scored inspections:
 - Offices
 - Conference spaces
 - Wellness and gym areas
 - High-touch surfaces

Monthly

- Comprehensive audit:

- All floors and service zones
- Equipment condition
- Sustainability compliance

5.1.4. Area-Based Quality Prioritization

Based on building usage:

Tier 1 – Critical (Multiple Daily Touchpoints)

- Lobby & reception
- Café / coffee / wine bar
- Restrooms
- Conference center

Tier 2 – High Engagement

- Wellness suite / gym
- Pantries / collaboration areas
- Roof deck access points

Tier 3 – Standard

- Office floors (Levels 3–6)

5.1.5. Scoring & Standards

- Inspection scale: 0–100%
- Acceptable threshold: $\geq 90\%$
- Immediate corrective action: $< 90\%$

Critical areas must maintain:

- Near-continuous readiness during business hours

5.1.6. Deficiency & Corrective Action Process

1. Issue identified (inspection or occupant feedback)
2. Logged in QC system
3. Immediate response (for critical areas)
4. Root cause identified:
 - Staffing
 - Training
 - Frequency
5. Corrective action implemented within defined timeframe

5.1.7. Technology & Reporting

- Digital inspection platform (mobile-enabled)
- Real-time tracking of:
 - Inspections
 - Work orders
 - Issue resolution
- Reporting cadence:

- Weekly summary to HITT
- Monthly performance dashboard

5.1.8. Integration with Day Porter Program

Day porters (6:30 AM – 5:00 PM coverage) are embedded into QC:

- Continuous monitoring of:
 - Restrooms
 - Pantries
 - High-traffic zones
- Immediate response to:
 - Spills
 - Restocking needs
 - Occupant requests

5.1.9. Sustainability Compliance Monitoring

- Use of LEED-compliant products and processes
- Monitoring:
 - Chemical usage
 - Waste handling
 - Equipment efficiency (battery-operated requirements)

6. QUALITY ASSURANCE PLAN

6.1. Objective

The Quality Assurance (QA) Program ensures that the QC system is effective, consistent, and continuously improving over time.

6.2. QA Oversight Structure

- QA Manager (independent from site operations)
- Reports at regional level

6.3. QA Activities

A. QC Validation Audits

- Verify:
 - Inspections are performed
 - Scores are accurate
 - Issues are properly resolved

B. Random Independent Inspections

- QA re-inspects previously scored areas
- Detects:
 - Score inflation
 - Missed deficiencies

C. Trend & Risk Analysis

Monthly review of:

- Recurring issues
- High-risk areas:
 - Lobby
 - Café
 - Wellness spaces
- Staffing adequacy

D. KPI Tracking

- Inspection scores over time
- Response times
- Complaint frequency
- Repeat deficiencies

E. Customer Feedback Integration

- All feedback logged and categorized:
 - Service quality
 - Responsiveness
 - Experience
- Tied back to:

- QC scores
- Staffing levels

6.4. Continuous Improvement Process

Monthly QA Review with HITT:

- Review trends
- Identify improvements
- Adjust:
 - Staffing levels
 - Cleaning frequencies
 - Methods

6.5. Risk Mitigation Strategy

Focused on:

- High-visibility areas (lobby, conference center)
- Event-driven usage spikes
- Amenity-heavy spaces

6.6. Reporting

Monthly QA Report includes:

- Performance trends
- Key risks
- Corrective actions
- Improvement initiatives

You position as: “A workplace experience partner that happens to deliver janitorial services.”

“Our approach is designed not only to maintain cleanliness, but to actively support HITT’s workplace experience, sustainability goals, and brand standards in a highly visible, amenity-driven environment.”

7. CLEANING WITH A PURPOSE

7.1. Sustainability & Environmental Standards Overview

7.1.1. Environment, Health, Safety & Sustainability (EHS&S)

Mister Kleen integrates environmental health, safety, and sustainability across all operations, supported by certified EHS&S professionals. Our approach protects people, assets, and the environment while helping clients advance long-term ESG goals.

Expert Oversight

- Certified Safety Professionals (CSP)
- Certified Sustainability & Resilience Professionals
- Fitwel Ambassadors

7.1.2. Green Seal GS-42 Certified

We use safer chemicals, sustainable equipment, and protective procedures validated by Green Seal GS-42 certification.

7.1.3. CIMS-GB With Honors

This certification demonstrates our proven commitment to sustainable, high-performance cleaning practices.

7.1.4. Sustainable Procurement

We evaluate chemicals, equipment, and supplies to ensure alignment with LEED, WELL, and Fitwel standards.

7.1.5. Commitment to Safety

Our organization prioritizes training and engagement at all levels, supporting industry-leading TRIR and Mod rates.

7.1.6. Cleaning With Purpose

This program emphasizes health, environmental stewardship, and measurable outcomes.

- High-touch and high-traffic disinfection
- Indoor air quality improvements using HEPA-filtered equipment
- Low-toxicity cleaning products
- Performance tracking for accountability

7.1.7. Supporting Client Objectives

- LEED, WELL, and Fitwel alignment
- Sustainability reporting (EcoVadis, CDP)
- Risk mitigation through safety and compliance tools

7.1.8. Service Value

Our sustainability-driven programs:

- Strengthen workplace health & hygiene
- Enhance occupant wellness
- Reduce waste and environmental impact
- Support corporate ESG initiatives

With Mister Kleen, facilities are not only clean—they are healthy, sustainable, and aligned with the highest environmental stewardship standards.

8. Mister Kleen Uniform Standards for Client Sites

Mister Kleen is committed to presenting a polished, professional image at all client facilities. To maintain the high standards expected by our valued partners, all on-site personnel adhere to a consistent uniform and appearance policy designed to reflect reliability, cleanliness, and respect for your workplace environment.

8.1. Professional Appearance

Our team members arrive in clean, well-maintained uniforms that are appropriate for the specific facility and its requirements. Uniform standards include:

- Company-issued polo shirts or smocks, worn neatly and in good condition
- Khaki-style work pants with proper fit and professional appearance
- Closed-toe, rubber-sole footwear suitable for safety and mobility
- Company-issued outerwear when needed for climate or duty requirements

8.2. Site-Specific Requirements

Mister Kleen respects and adapts to all client policies regarding appearance, including restrictions related to tattoos, piercings, or accessory items. Any site-specific expectations are communicated to our staff in advance to ensure full compliance from day one.

8.3. Consistency & Professionalism

We ensure:

- A clean, uniform presentation across all shifts
- Clothing that allows for safe and effective job performance
- No hoodies or non-uniform garments inside the facility (unless authorized for exterior work)
